

Build the Automation Engine for Compliance Training

The Challenge: Build an AI-powered human-in-the-loop pipeline for generating high-quality customized training programs for regulatory requirements.

YOUR TASK

Create a tailored compliance training program that proves:

- ✓ It is compliant to regulatory requirements (AMLR)
- ✓ The right training is mapped to the right role, based on their actual risk exposure

Your solution must auto-generate a training plan per role, based on:

Role description

Who is the person and what is their function?

Tasks & responsibilities

What do they actually do day-to-day?

Risk exposure

What AML, sanctions, fraud or documentation risks do they face?

Regulatory requirements

Which AMLR articles and obligations apply to this role?

Competency needs

What knowledge and skills are required to manage their risk?

The solution should provide an effective mechanism for AI and humans to collaborate in the generation process.

RESOURCES

The material you'll receive

You won't start from zero. Teams receive structured inputs across these areas:

Role Descriptions

KYC Analyst · AML Investigator · Compliance Officer · Front Office Advisor

Each with typical tasks: onboarding, screening, transaction monitoring, escalation

Risk Exposure

AML risk · Sanctions risk · Fraud risk · Documentation risk · +1 more

Pre-mapped risk levels per role to guide training depth

Regulatory Material

Selected AMLR articles · Risk-based methodology guidance · Competency & training obligations

Key extracts from AMLR 2024/1624 relevant to each role

How we will evaluate your work

Evaluation Criteria

- 25%** **Risk-Role-Competency Link & Explainability**
Does risk exposure drive the right training, and can the user see WHY the training was assigned?
- 20%** **Regulatory Relevance**
Does the solution reflect AMLR requirements?
- 15%** **Automation Degree**
How much of the process is automated?
- 15%** **How to make the solution proprietary**
Does the solution have unique elements that competitors cannot easily copy?
- 10%** **Ease of Use**
Is the solution intuitive in practice?
- 10%** **LMS Functionality**
Can training be assigned and tracked?
- 5%** **Business Relevance**
Would an organisation actually use this?

Example Scenario

-  KYC Analyst
-  Front Office Advisor
-  Compliance Officer

Using different roles to demonstrate:

- 1 Role mapping & import existing roles into the system
- 2 Validate roles against AMLR obligations and compliance functions
- 3 Risk assessment per role across AMLR, sanctions and fraud dimensions
- 4 Auto-generated structured training path specific for each role
- 5 Explain why each module was included and show the earning being
- 6 Assignment in a simple LMS view

The following slides demonstrate:

A Risk-Based Approach to Role-Based Training

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

Role Description

1

Why is role-based training needed?

2

What are the main areas of responsibility?

3

What is the inherent AML exposure?

4

What are the key risk themes?

5

How to ensure regulatory accountability?

6

How to ensure role-specific competence?

7

Role-based training
focus

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

This role does not own the customer relationship and does not make commercial decisions. The responsibility is risk understanding and escalation.

1

Role Function / The why?

The KYC Analyst (EDD) conducts enhanced due diligence on high-risk customers to ensure that the bank has a complete and sound understanding of the customer's identity, business, source of funds, and the actual risk associated with the customer.

The role is a critical control function that shall prevent the bank from establishing or maintaining customer relationships linked to money laundering, terrorist financing, or other financial crime.

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

2

Main Areas of Responsibility

- Conduct enhanced due diligence (EDD) for higher-risk customers
- Review and validate customer ownership, control, and corporate/organisational structure
- Assess source of funds and source of wealth where required
- Perform periodic KYC reviews based on risk level
- Identify discrepancies between customer information and observed behaviour
- Document risk assessments and conclusions in a manner that is auditable and regulator-ready
- Escalate suspicious indicators to AML investigations as needed

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

3

Inherent AML Exposure

- Handles the bank's highest-risk customers
- Relies on professional judgement, not just checklists
- Weak or flawed analysis can allow illegitimate customers to go undetected
- Failure to escalate can directly lead to regulatory breaches

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

4

Key Risk Themes

- Risk related to beneficial ownership and control
- Risk in high-risk customer onboarding
- Risk related to ongoing customer due diligence and periodic reviews
- Jurisdictional and geographic risk
- Risk related to documentation and audit trail
- Risk related to escalation and reporting

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

5

Regulatory Accountability — Key Obligations

- Apply a risk-based approach to customer due diligence
- Perform due diligence on high-risk customers
- Maintain accurate and up-to-date customer information
- Identify and escalate suspicious activity
- Maintain clear documentation and audit trail

Risk-Based Approach to Role-Based Training for KYC Analyst (Enhanced Due Diligence / EDD)

For illustrative purpose

6

Role-Specific Competence

Knowledge

- Enhanced due diligence (EDD) requirements
- Ownership and control structures
- Concepts of source of funds and source of wealth
- AML typologies relevant to the bank's customers

Skills

- Analyse complex customer structures
- Assess the plausibility of financial explanations/narratives
- Write clear, well-reasoned risk rationales
- Identify red flags and inconsistencies/discrepancies

Judgement

- Knowing when explanations are insufficient
- Escalating under uncertainty
- Applying standards consistently, even under pressure

The Result → Role-specific, Risk-based Compliance Training

For illustrative purpose

How to build a compliance training program:

Example training plans tailored to roles

Training plan: Transaction Monitoring Analyst

This training plan is built around the specific risks, regulations, and behaviours required for the **Transaction Monitoring Analyst** role. It is designed not just to build knowledge, but to drive genuine behavioural change: ensuring regulatory obligations are understood, internalised, and consistently applied in day-to-day work.

Q1: Foundation

Q2: Application

Q3: Deepening

Q4: Embedding

Training Philosophy

- Year 1 is intensive: building foundation, applying knowledge, and assessing competency
- Years 2–4 maintain and deepen skills through annual refreshers, specialist development, and peer contribution
- Behavioural change is evidenced through QA reviews, assessments, and reflective practice
- Regulatory literacy is built progressively — not just ticked off once

Training Path – Y1

Building knowledge to embedded behaviour

Q1: Foundation

Q2: Application

Q3: Deepening

Q4: Embedding

Training plan: **Customer Advisor**

This training plan is built around the specific risks, regulations, and behaviours required for the **Customer Advisor** role. It is designed not just to build knowledge, but to drive genuine behavioural change, ensuring regulatory obligations are understood, internalised, and consistently applied in day-to-day work.

automatically.**

Abbreviations

Abbr.	Full Term	Explanation
AMLR	Anti-Money Laundering Regulation	EU regulation (2024/1624) requiring function-specific, risk-based and documented AML training
AML	Anti-Money Laundering	Laws, regulations and procedures to prevent criminals from disguising illegal funds as legitimate income
KYC	Know Your Customer	Process of verifying client identity and assessing risk profile before and during a business relationship
CDD	Customer Due Diligence	Identifying and verifying a customer's identity and assessing the risk they pose — a core KYC obligation
EDD	Enhanced Due Diligence	Higher level of scrutiny applied to high-risk customers such as PEPs or those from high-risk jurisdictions
PEP	Politically Exposed Person	Individual holding a prominent public position, requiring enhanced scrutiny due to elevated corruption risk
LMS	Learning Management System	Software platform used to assign, deliver, track and report on training and learning activities
MLRO	Money Laundering Reporting Officer	Designated person in a regulated firm responsible for receiving and assessing suspicious activity reports
CCO	Chief Compliance Officer	Senior executive overseeing the organisation's compliance programme and regulatory obligations
EBA	European Banking Authority	EU regulatory agency issuing guidelines and technical standards for the banking sector, including AML/CFT
FATF	Financial Action Task Force	Intergovernmental body setting global standards for combating money laundering and terrorist financing
GDPR	General Data Protection Regulation	EU regulation governing the collection, processing and storage of personal data
DPIA	Data Protection Impact Assessment	Process to identify and mitigate data privacy risks — required under GDPR for high-risk processing activities
